

# LaseCPV - Container Profiling Vessel

Product module **CEWS** Container Logistics

The solution LaseCPV - Container Profiling Vessel is designed to ensure a collision prevention between load and container on the vessel. The use of robust and state-of-the-art laser technology has the objective to diminish the risk of accidents while STS spreader operations.

This measurement system consists of two LASE 2000D laser scanners which are mounted under the trolley. The specific software application collects the scan data, does all necessary calculations and sends the results to the PLC.

The laser scanners look downwards with a scan plane across two bays. When the trolley starts driving over the vessel, the measurement system generates a 2D-profile of the stacks within the bays. Additionally the spreader is in the view of the scanners. By comparing the actual load position [spreader with/without container] with the profile of the stacks a collision prevention is ensured.

The LaseCPV [Container Profiling Vessel] measurement system is primarily designed for STS crane operations and serves both to increase the safety and an efficient workflow in container handling.

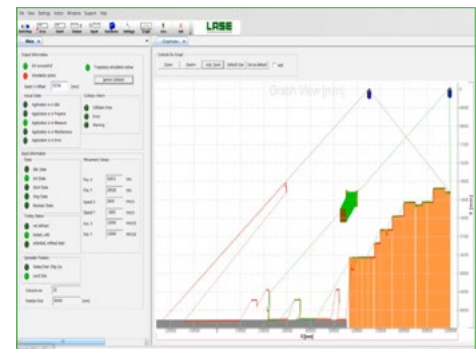

This intelligent and innovative solution is built to diminish the risk of collisions and accidents during vessel loading and unloading. The measurement system by LASE is applicable for topography detection and collision prevention at STS cranes.

## Customer Benefits & Features:

- 2D container profiling
- Collision prevention between spreader and container stacks on vessels
- Gentle container handling through soft landings
- Stack height information for path optimisation
- Stack topography verification
- Less spreader wear
- Driver assistance

## Function principle

LASE offers innovative and productive solutions by combining state-of-the-art laser hardware technology and sophisticated software applications. We deliver a broad range of precise and reliable 1D, 2D and 3D laser systems, which can be used for several measurement tasks.

We look to develop long-term relationships with our customers to drive projects forward and help improve safety and efficiency at a huge diversity of applications worldwide through working closely with them.

COMPETENCE, CREATIVITY AND PASSION lead us to be the ideal partner for your requirements. Convince yourselves of our broad portfolio of innovative products and solutions on our corporate website.
